## Introduction

Nakshatra dasas such as Vimsottari dasa are very important for timing events. Nakshatra dasa lord is a very important planet and he has a strong influence on the mind of a native at the time. Vedic Astrologers have traditionally used the nakshatra dasa lord's transit in various ways, *e.g.* houses occupied from natal Moon and natal lagna and aspects on natal positions in rasi chart.

I found an interesting correlation between the longitude of nakshatra dasa lord in *transit* and *divisional* longitudes of *natal* planets. I want to share a specific principle based on the correlation I found. Please note that this principle is not intended to *replace* the techniques that Vedic astrologers traditionally employ, but meant to *augment* them.

## Principle

Maharshi Parasara defined 16 divisional charts. While mentioning the matters seen in each divisional chart, he said shashtyamsa (D-60) shows "everything". In the vimsopaka bala of dasa varga and shodasa varga, shashtyamsa is given a higher weightage than even the rasi chart. It seems like a key chart. The correlation I found between the longitude of nakshatra dasa lord in transit and longitudes of natal planets involves D-60.

The principle I found is very simple:

At the time of a major event in life, the nakshatra dasa lord in transit has a close conjunction with or a close aspect on the natal D-60 divisional longitude of a planet that has a strong influence on the relevant house in D-60, reckoned from lagna or Moon or karaka.

In this research, I used partial aspects (*e.g.* 3/4<sup>th</sup> aspect on 4<sup>th</sup> and 8<sup>th</sup> houses) described by Parasara and also used the divisional longitudes of planets freely. I used true nodes. I used Jagannatha ayanamsa, which is a variation of Lahiri ayanamsa. It *fixes* the Chitra star at 180°, instead of letting it *wobble* around 180° as happens with the regular Lahiri ayanamsa. It also fixes the two-dimensional plane onto which planets are projected, to the *mean* Sun-earth plane (which is also known as the Vishnu-nabhi plane), instead of projecting the planets to *different* two-dimensional planes at different times as happens with the regular Lahiri ayanamsa. All the calculations used are available in the free software "Jagannatha Hora" that can be downloaded at <http://www.VedicAstrologer.org/jh>.

## Example 1: Marriage

*Birthdata:* 1973 July 26, 9:48:10 pm (IST), Guntur, India (80e28, 16n18)

*Event:* She got married on 1999 January 24.

She was then running Jupiter dasa as per Vimsottari dasa. Jupiter was at 2Pi02 at that time. In her natal D-60, Sun's divisional longitude is 1Pi55. Sun is the 7<sup>th</sup> lord from lagna and he is strong in a friendly sign. So Sun is an important planet for marriage. Transit Jupiter at 2Pi02 has a close conjunction with natal D-60 Sun at 1Pi55.

## Example 2: Marriage

*Birthdata:* 1970 October 5, 12:32 pm (IST), 80e21, 15n49

Transit Ketu at 28Cp24 has a close conjunction with natal D-60 Mars at 26Cp56.

NOTE: Some people may think that Chaturaseeti sama dasa is applicable here because the 10<sup>th</sup> lord Mercury is in the 10<sup>th</sup> house. However, lagna is at 18Sg03 and Mercury is at 2Vi37. So 10<sup>th</sup> lord Mercury is in the 9<sup>th</sup> house and not in the 10<sup>th</sup> house. So we stick to Vimsottari dasa.

Transit Jupiter at 1Aq34 has a close conjunction with natal D-60 Jupiter at 6Aq17.

## **Example 34: Coming of Spiritual Successor (Aurobindo Ghose)**

*Birthdata:* 1872 August 15, 5:08 am (LMT, i.e. 5:53 east of GMT), Calcutta, India (88e22, 22n32)

*Event:* His spiritual successor (Mirra Alfassa, known as “Mother”) came to him on 1914 March 29.

He was then running Mars dasa as per Vimsottari dasa. Mars was at 22Ge41 at that time. In his natal D-60, divisional longitude of Mercury is 27Ge22. Mercury is the significator of disciples and he owns the 5<sup>th</sup> house of disciples. He is an important planet for the coming of disciples. Transit Mars at 22Ge14 has a close conjunction with natal D-60 Mercury at 27Ge22.

## **Example 35: Experience of Self (Ramana Maharshi)**

*Birthdata:* 1879 December 30, 1:02 am (IST), Pondicherry, India (78e15, 9n50)

*Event:* He held spontaneous self-enquiry and experienced Self on 1896 July 17.

His lagna and Moon are in vargottama. So Sataabdika dasa started from lagna or Moon is applicable and works better than Vimsottari dasa. He was then running Venus dasa as per Sataabdika dasa started from lagna or Moon. Venus was at 4Cn58 at that time. In his natal D-60, divisional longitude of Saturn is 4Cp25. Saturn is the lord of the 12<sup>th</sup> house of liberation from lagna, Moon and also AK. He is an important planet for spiritual liberation. Transit Venus at 4Cn58 has a close aspect on natal D-60 Saturn at 4Cp25.

## **Example 36: Nirvikalpa Samadhi (A contemporary yogi)**

*Birthdata:* 1970 November 4, 3:12:34 pm (IST), Lucknow, India (80e55, 26n51)

*Event:* He entered Nirvikalpa Samadhi\* in May 2004.

He was then running Rahu dasa as per Vimsottari dasa. Rahu was around 17Ar20 at that time. In his natal D-60, divisional longitudes of Saturn and Ketu are 15Le43 and 18Le11. Saturn is the lord of the 12<sup>th</sup> house of liberation from lagna and aspects the 12<sup>th</sup> house, conjoined by Ketu who is the karaka for the 12<sup>th</sup> house of liberation. So Saturn and Ketu are important planets for spiritual liberation. Transit Rahu at 17Ar20 has a close aspect on natal D-60 Saturn at 15Le43 and natal D-60 Ketu at 18Le11.

## **Observations**

The correlations I found in this research are too good to merely be random coincidences. I am convinced that there is something really worthwhile here.

### ***Divisional Longitudes***

This research article, along with the previously published research article titled “Stationary Planets in Transit”, establishes that divisional longitudes are a valid concept and that there are some valid transit principles based on them. Researchers will do well to consider longitudes of planets in divisional charts and not ignore them.

\* Nirvikalpa Samadhi is a state where I-ness (individualized Self) merges back into Brahman/Aatman (undifferentiated Self or the Supreme Cosmic Essence) and all objectification and duality ceases. Observer, observed and observation merge into one, without any differentiation whatsoever.

## ***Shashtyamsa Chart***

This research suggests that there is much more to shashtyamsa (D-60) than what we are aware of. The fact that D-60 gets a higher weightage than rasi chart in the vimsopaka bala calculation, as per both dasa varga and shodasa varga schemes, and the fact that Parasara said “everything” is seen from D-60, suggest that D-60 is a very fundamental and key chart. It may not merely be a chart to see the “past life” as taught by some astrologers before. In fact, the teaching that arudha lagna (AL) in D-60 can be taken as lagna to see the last life is suspect. Sri K.N. Rao collected some data relating to past life research. He collected the data relating to previous life’s birth, previous life’s death and current life’s birth, belonging to some people who recollected their past life and gave details about the past life that were later verified by researchers. His data does not suggest any correlations between D-60 chart of the current life and rasi chart of the previous life.

The D-60 is a fundamental and key chart. We need more research to completely unearth its true significance.

## ***Conditional Dasas***

Though the specific principle presented here seems to work well in a good percentage of examples, it did not work in some charts I considered.

The conditions of some conditional dasas may be tricky to apply. Also, whether the nakshatra that starts a conditional nakshatra dasa should be that of lagna or Moon or Sun is questionable. One finds some examples where the Vimsottari dasa lord does not associate with a natal D-60 planet of interest, but some other transit planet closely associates. There may be a different dasa that applies better in such a case. Also, D-60 lagna may be inaccurate in un-rectified charts.

## ***Further Research***

This research is possibly the tip of an iceberg.

There must be ways to use divisional longitudes of D-45, D-40 *etc* charts and also the divisional chart of interest (*e.g.* D-10 for career, D-7 for children, D-9 for marriage *etc*). Those are left for future research articles.

I strongly recommend researchers to stick to Jagannatha ayanamsa, true nodes and house system I deduced earlier based on BPHS (0-30 deg from lagna being the 1<sup>st</sup> house, 30-60 deg being the 2<sup>nd</sup> house and so on) for fruitful research into simple and replicable principles like this.

## **Conclusion**

A simple principle related to a correlation of the longitude of nakshatra dasa lord in transit and longitudes of natal planets in D-60 was described and illustrated using many examples. If you like this knowledge, please feel free to refine it, use it and spread it. If not, please leave it.

It is hoped that intelligent and sincere students and researchers of this divine subject will take this knowledge further.
